Lumenis to delist shares in settlement with SEC

The SEC intends to recommend indicting a current Lumenis employee.

-

Lumenis Ltd. (OTCBB:LUME), which develops, manufactures, and markets laser-based medical devices, today announced that...
...SEC) Division of Enforcement to settle the previously disclosed SEC investigation.

Under the proposed settlement, **Lumenis** will not pay a fine, and the company will continue to cooperate with the ongoing SEC investigation. **Lumenis** will also agree to an SEC order delisting the company for trading in the US. Consequently, when the order comes into effect, **Lumenis's** shares cannot be quoted or traded in the US until the company can reregister...

A year ago, **Lumenis** announced that the SEC had recommended opening civil proceedings against the company for violating US securities laws. The recommendation was in connection with the reporting of certain transactions reflected in **Lumenis's** financial statements for 2002 and 2003, and for a company announcement from May 3, 2004, concerning a report by the company's auditing committee.

The SEC claims that **Lumenis** failed to provide correct details about the quarterly impact from the registration of certain transactions ...

...whereas some of the revenue should never have been registered at all. In other words, **Lumenis** inflated its revenue.

In today's proposed settlement, **Lumenis** said it will consent, without admitting or denying the allegations in a complaint to be...

...and records, and internal control provisions of the federal securities laws and related SEC rules.

Lumenis said, The proposed settlement is subject to final approval by the SEC and the...

...Company cannot give assurance that the SEC or the court will approve the proposed settlement.

Lumenis adds, While the proposed settlement, if approved, will achieve finality for the company, the company...

...is recommending that one current and one former employee will be the subject of SEC **charges**, that the former employee has agreed to settle the **charges** at the same time as the company and that the current employee does not intend to settle the **charges**.

Lumenis concludes, If the SEC issues an order for the deregistration of the Company's shares, **Lumenis** will continue normal business operations while the deregistration of the company's shares is in...

Specification: ...wall; see particularly the element 15b at the right hand portion of Fig. 3.

Each **body** 16 has a pair of longitudinally extending **lumens** therein, **namely** a first **lumen** 23 and a second **lumen** 24 at the left hand **portion** of Fig. 4. The first and second **lumens** 23,24 can be considered to be essentially longitudinally extending and further extend from one... ..21 of the body 16 to the other end wall 22 so as to provide a through passage for the thermal fluid. Each **lumen** 23,24 in each element 15a,15b is equipped with a check valve as at... ..seen to be positioned along the longitudinal midplane of the body 16 or 26 and **thus** lies between the axis of the first **lumen** 23 and the axis of the second **lumen** 24.

Extending longitudinally away from the first portion 28 is a male **projection** 30 which is aligned with the first **lumen** 23. Extending inwardly, i.e. toward the end wall 21 from the end wall 22... ..of the recess 31 conforms to the external contour of the projection 30 and, in **effect**, is also a continuation of the second **lumen** 24.

Referring again to Fig. 3, it will be seen at the extreme left hand portion thereof that there is a pair of coupling elements 32 **and** 33 which couple the first and second **lumens** 23,24 to the tubes 13,12, respectively. These are advantageously provided in the form... ..adapters 34,39 which are seen in Figs. 6 and 7. The adapter 34 shown **in** Fig. 6 is associated with the first **lumen** 23 and includes a first portion 35 which is relatively tapered so as to fit... ..tapered bore 37 which receives a first tapered portion 38 of the adaptor 39 shown **in** Fig. 7 and associated with the second **lumen** 24. The tapered portion 38 is shorter than the tapered portion 35 due to the... ..from the first portion 28 of the hermaphroditic end wall 22 - and on the side **of** the projection 30 remote from the second **lumen** 24. It will be noted that the **fee** end 44 of the arm 43 is equipped with a barbed portion 45 which passes... ..release feature which includes a a second arm 49 also extending longitudinally but not quite **as** far as the arm 42. At its **fee** end, the arm 49 - see the upper central portion of Fig. 5 is equipped with...

Claims: ...19,20) and a pair of end walls (21,22), a pair of longitudinally-extending **lumens** (23,24), extending through said body from one end wall to the other, one each... ...a sidewall, one of said end walls being equipped with coupling means aligned with said **lumens** for coupling the same to tubing means, the other of said end walls being equipped with a step (27) between said **lumens** and defining first and second portions (28,29) in said other end wall, said first...
...extending longitudinally away from said one end wall and aligned with a first of said **lumens** and providing a continuation of the same, and a longitudinally extending recess (31) in said second portion aligned with the second of said **lumens** and providing a continuation of the same, said recess having an interior conforming to the... ...be connected to said body.

2. An element according to Claim 1 in which each **lumen** is equipped with a check valve (25) openable by the connection of said second element...
...first portion and being located on the side of said projection remote from said second **lumen**, the latch means on the second of said sidewalls including a passage (46) extending longitudinally... ...the arm on said body, said passage being located on the side of said second **lumen** remote from said first **lumen** and terminating a spaced distance from said one end wall to provide an intermediate transverse... ...means include a pair of tapered bores (36,37) in said body aligned with said **lumens** and extending longitudinally from said one end partway toward said other end wall with the bore associated with said first **lumen** extending closer to said other end wall than the bore associated with said second **lumen**, said first **lumen** bore extending into said projection, and a hollow tubular adaptor (34,39) in each bore... ...elements each include a block-like body (16,26) having first and second longitudinally extending **lumens** (23,24) extending therethrough, each body having said hermaphroditic end, said end including a steppedportion (28) being equipped with a longitudinally extending tubular projection (30) aligned with said first **lumen**, said end also including a second wall portion (29) equipped with a longitudinally extending recess (31) aligned with said second **lumen** and sized to receive the tubular projection of the other element.

13. An element according...

English Abstract:

...window. The inner tubular member is coaxially disposed within the passage, and defines a central **lumen** and a cutting tip. The cutting tip forms an open mouth having a plurality of...

Detailed Description:

...with the distended nucleus tissue compressing against a spinal nerve (e.g., disc herniation). Similarly, **fee** disc may degenerate over time, leading to a collapse of the disc space.

Surgical procedures... inner tubular member is coaxially disposed within the central passage, and further defines a central **lumen** and a cutting tip at a distal end thereof. The cutting tip forms a mouth that is open to **fee lumen** and has a plurality of teeth formed along a perimeter upon final assembly, the... the cutting tip. Finally, the sheared material is aspirated through the inner tubular member's **lumen** via the mouth. In one embodiment, the surgical instrument further includes an irrigation mechanism. The inner tubular member is coaxially disposed within the central passage, and defines a central **lumen** and a cutting tip. The cutting tip forms a plurality of circumferentially-extending teeth about a mouth that is otherwise fluidly connected to the **lumen**. Upon final assembly, the cutting tip is exposed within the cutting window, with the cutting... shear intervertebral disc material, as well as to aspirate sheared material through the mouth and **lumen**.

Brief Description of the Drawings FIG. 1 is a perspective view of an inter vertebral... teeth 66 are formed to be highly sharpened (e.g., tip width or thickness on **fee** order of approximately 0.005 inch), and wrap or curve in conformance with a curvature... to establish an irrigation fluid flow path to and from the central passage 46 of **fee** outer tubular member 26 upon final assembly, as described below. The outer hub 70 and... 82, and a distal region 84. Further, the inner tubular member 30 defines a central **lumen** 86 extending from the proximal region 80 to the distal region 84. Once again, the... 0.002 inch).

The mouth 94 is open to, and thus fluidly connected with, the **lumen** 86. As described in greater detail below, this configuration establishes an aspiration pathway from the mouth 94 and through the **lumen** 86. In this regard, material aspirated via the **lumen** 86/mouth 94 can be removed via an appropriate port associated with the second assembly... order of 3-8 mm, more preferably 4.5 mm, to reduce clogging of the **lumen** 86 during use. Alternatively, other dimensions can be employed.

Regardless of the exact configuration, at... a variety of forms, and can be electrically, or battery, or pneumatically powered.

Assembly of **fee** instrument 20 includes securing the first hub assembly 28 to the outer tubular member 24...

Claims:

...member coaxially disposed within the central passage, the inner tubular member defining a central **lumen** and a cutting tip at a distal region thereof, the cutting tip including a plurality of teeth formed about a mouth otherwise fluidly connected to the **lumen**, wherein upon final assembly, the cutting tip is exposed within the cutting window, and the... the teeth of the cutting tip; and aspirating the sheared intervertebral disc material through the **lumen** via the mouth. 2 The method of claim 1 wherein shearing the contacted intervertebral disc...
...member coaxially disposed within the central passage the inner tubular member defining a central **lumen** and a cutting tip at a distal end thereof, the cutting tip including a plurality... teeth formed about at least a portion of a mouth otherwise fluidly connected to the **lumen**; wherein upon final assembly the cutting tip is exposed within the cutting window, the cutting... head configured to shear intervertebral disc material and aspirate sheared material through the mouth and **lumen**

15. The installment of claim 14. wherein the cutting tip has a diameter in the...
